

Kohin Khandwalla

Professional Summary

Results-oriented software engineering professional. Well-versed in promoting object-oriented approaches to real-time software development. Analytical and detail oriented. Growing expert in diverse programming languages, including C++ and Java.

Work History

TRS Inc – Software Engineer Intern

Tallahassee, FL

08/2020 - 04/2021

Implemented CMMC steps to achieve “Level 1” regarding cybersecurity protection, including:

- Limited information system access to authorized users within the facility.
- Identified information of system users and processes conducted on behalf of users.
- Implemented subnetworks for publicly accessible system components, separated from internal networks.
- Provided protection from malicious code at appropriate locations within organizational information systems.

Projects

GitHub: <https://github.com/Kohink>

JINGLE (<https://github.com/dantecoupet/jingle>) - Built with Python (Django)

- Web app that takes in search queries from the user, and returns songs related to the key words the user enters. Songs can also be expanded to show the songs information, providing lyrics, a 30 second snippet of the song, song title, song artist, and related YouTube videos.
